DIGI EX50

5G / 4G LTE cellular connectivity in a compact, all-in-one solution for primary or backup fixed wireless access (FWA) connectivity

Business has forever changed with millions of employees working remotely. The Digi EX50 router with 5G/4G dual connectivity provides businesses with a secure, resilient and optimized enterprise-grade network that changes the work from anywhere experience for good. Its small form factor allows device placement where the work is happening.

Reduce the complexity of managing multiple devices, and simplify installations and day-to-day management with **Digi Remote Manager®**. Establish valuable network resilience with 4G failover in cases of 5G disruption, and gain additional security and enterprise features. The Digi EX50 is an ideal choice for businesses as they adapt to the new normal.

The latest generation Wi-Fi 6 radios in the Digi EX50 router operate simultaneously on 2.4 and 5 GHz with higher speed,

capacity, quality of service and range than previous Wi-Fi 5 products to support many clients, bandwidth-intensive devices and new use cases such as AR/VR. Dual SIM slots provide carrier flexibility and wireless failover, and with 4G LTE and 3G fallback, you're covered in areas where 5G is not yet deployed.

Digi EX50 supports a wide range of indoor use-cases beyond A/C controlled spaces with an extended operating temperature range, such as smart factories, warehouses, construction sites or infrastructure sheds.

An available serial port with Cisco straight-through pinout can provide out-of-band (OOB) management for other on-site equipment. To simplify installation, Digi EX50 can be directly powered by an active PoE+ switch or a DC IN barrel connector as the primary or backup power source for redundancy.

FEATURES AND BENEFITS

- Future-proof and ready for new use cases such as 5G network slicing, SD-WAN, 4K/8K cameras and AR/VR
- High-speed 5G NR and 4G LTE-Advanced Pro Cat 20 dual connectivity cellular radio
- Enterprise-grade Wi-Fi 6 and dual 2.5 Gigabit Ethernet
- Extended operating temperature range for wider use cases
- Standards-based Power over Ethernet simplifies installation
- Multiple mounting options and accessories
- Serial port for remote, out-of-band management
- Securely deploy, monitor and control devices with **Digi Remote Manager®**

CAPABILITIES

- Activate, monitor and diagnose your mission-critical devices from a single point of command and control — on your desktop or mobile app
- Schedule key operations — including firmware updates and file management — on a single device or on a group of devices, keeping your network functionality up-to-date and maintaining compliance standards
- Manage edge devices out-of-band via console terminal access
- Keep tabs on device health and connectivity across device deployments of any size
- Create detailed reports and enable real-time alerts for specified conditions
- Integrate device data through open APIs to gain deeper insights and control with third-party applications
- Report and alert on performance statistics, including connection history, signal quality, latency, data usage and packet loss

INFRASTRUCTURE

- Hosted in a commercial-grade cloud server environment that meets SOC 1®, SOC 2® and SOC 3® standards
- Superior availability, operating to 99.9% or greater
- Open APIs available to support application development

SECURITY

- More than 175 security controls in place to protect your data
- Member of the Center for Internet Security® (CIS®)
- Enables compliance with security frameworks like ISO27002, HIPAA, NIST and more
- Earned Skyhigh's CloudTrust™ Program highest rating of Enterprise-Ready
