

USAT serves the critical infrastructure by increasing operational safety, efficiency and responsiveness through 4G and 5G communications. USAT sources, configures and installs wireless data communication systems that securely deliver data transmissions between our customers' key systems and remote human and machine assets.

In 2020, our 24th year as a leader in IoT space, USAT's portfolio is expanding again. USAT thanks our clientele for their loyalty and the opportunity to be their trusted partner for connecting what is critical.

Intelligent Modems / Gateways / Routers

Now Supporting Private LTE and CBRS

Cellular Back-Haul Deployment Services

DevProv+™

- Wireless network device provisioning & testing
- Firmware management
- Template load
- Modem asset tagging & unique identifier documentation
- Wireless service activation management
- Implementation of hardware layer security
- U.S. - based help desk / technical support

Express M2M™

- LTE airtime plans
- Just-in-time device activations
- Rapid private network deployments
- Rapid deployment of configured, connected devices
- Static IPV4 addresses available

IoT Engineering Services

- M2M architecture design
- Device configuration
- Security services
- Custom sensors & triggers
- Advanced template configurations

Custom Antenna & Cable Assemblies

- Mobile/fixed antennas for all carriers
- Ultra-high gain for rural areas
- 4G-LTE, 5G, Private LTE, & CBRS options available
- Custom environmental enclosures built to spec
- Low-loss cables cut and crimped to length

*Company names, logos, marks, and slogans identifying products and services are trademarks and service marks of their respective owners.

The following solutions are available through our extended family of companies

Onsite Installation

- Routers & Gateways in Fleets & Fixed Locations
- Deployment Logistics Management
- AVL / Vehicle Telemetry for Fleets
- Device Data Sanitization
- NEMA Enclosure Deployment
- Cameras in Fleets & Fixed Locations
- MDT Computers in Fleets

Radio Communications

- Commercial Radios
- MOTOTRBO Radios
- Public Safety Radios
- Radio Systems
- Wave Wireless Network
- Radio Rentals

Video Access Control

- Video-Based Access Doors
- Secure Entry Systems
- Keyless Door Entry

Mass Notification Systems

- Siren Systems
- Mass Voice/SMS Messaging
- Emergency Management
- Disaster Notifications
- Public Safety Announcements

Microwave & CBRS Solutions

- Ultra-High Capacity
- Fiber Alternative up to 170 GHz
- CBRS Network Solutions
- Rapid Network Expansion
- Network Slicing & Management

Mobile Computing Hardware

- Rugged Computing Platforms:
 - Panasonic Toughbooks
 - Panasonic Arbitrator Evidence Collection
