Remote Worker Solutions

Connectivity You Can Count On

Today businesses and organizations of all sizes have to adapt to protect their employees, and their community, by providing the ability for people to work remotely. This requires maintaining secure and reliable communications for your remote and mobile workers.

For over 20 years, USAT has partnered with Sierra Wireless to keep people securely connected with their industry leading AirLink® routers. You can count on us to help you keep workers safe and connected no matter where they are.

Keeping Remote Workers Securely Connected

From business leaders and team members working from home to managers monitoring critical infrastructure or healthcare workers setting up temporary medical facilities, USAT can quickly provide and maintain secure connectivity with Sierra Wireless devices. We're here to help keep communities safe and informed.

AirLink Complete

Our offering of Sierra Wireless routers comes with AirLink Complete to help monitor and manage your devices to sure they are operating at peak performance:

• AirLink Complete is a subscription service that combines best-in-class device management software, industry-leading technical support, and an extended warranty.
• It is a cost-effective way to ensure mission-critical infrastructure operates at peak efficiency.
• AirLink Complete is included free for one year with the purchase of an eligible AirLink device, including the RV55, RV50X, MP70, ES450, GX450, LX40 and LX60.

Remote Situation	Recommended AirLink Routers
REMOTE WORKER SOLUTIONS	LX40 or LX60

- Business leaders and team members need to work from home securely and productively.
- They require access to the Internet and perhaps to their organization's network.

PUBLIC SAFETY WORKERS	MG90 or MP70

- First Responders need to ensure critical connections are operating at peak efficiency and with low latency.
- Police, fire, and emergency medical services require a secure connection from their vehicle to various types of equipment.

TEMPORARY HEALTH FACILITY WORKERS	RV50X or RV55

- Whether it's for days or weeks, health care workers in temporary facilities need access to critical information and patient records.
- Confidentiality is of primary concern.

CRITICAL INFRASTRUCTURE MANAGERS	RV50X or RV55

- Essential workers who manage critical infrastructure may not have timely access to monitoring stations.
- They require access to sensitive and timely information.
- Security is of paramount concern.

OUT-OF-BAND MANAGEMENT	ES450 or GX450

- IT administrators need to remotely troubleshoot and repair network equipment.
- Personnel no longer need to be deployed to for manual resets, dramatically reducing the number of field or site visits.

LX40   RV55   GX450   ES450

LX60   MG90   MP70   RV50X
